

RESOLUTION

CASE NO. SUP-29-06. WILLIAMSBURG-JAMES CITY COUNTY

8TH ELEMENTARY SCHOOL AMENDMENT

WHEREAS, the Board of Supervisors of James City County has adopted by ordinance specific land uses that shall be subjected to a Special Use Permit (SUP) process; and

WHEREAS, Mr. Sanford Wanner has applied, on behalf of James City County, for an SUP to allow for an elementary school on approximately 40.285 acres of land on a parcel zoned A-1, General Agricultural; and

WHEREAS, the proposed school site is shown on a conceptual layout prepared by Timmons Group, entitled "New Elementary School" and dated March 7, 2006; and

WHEREAS, the property is located on land zoned A-1, General Agricultural, and can be further identified as a portion of James City County Real Estate Tax Map/Parcel No. (36-3)(1-1); and

WHEREAS, the Planning Commission of James City County, following its public hearing on November 6, 2006, recommended approval of this application by a vote of 7-0; and

WHEREAS, the Board of Supervisors of James City County, Virginia, following a public hearing, finds this use to be consistent with the 2003 Comprehensive Plan Land Use Map designation for this site.

NOW, THEREFORE, BE IT RESOLVED that the Board of Supervisors of James City County, Virginia, does hereby approve the issuance of SUP No. 29-06 as described herein with the following conditions:

1. The Property shall be developed generally as shown on the Master Plan entitled "New Elementary School" and dated March 7, 2006 (the "Master Plan"), with only changes thereto that the Director of Planning determines do not change the basic concept or character of the development.
2. There shall be a 50-foot perimeter buffer generally as shown on the Master Plan. The buffer shall be exclusive of any structures or paving and shall be undisturbed, except for the entrances and sidewalks shown generally on the Master Plan, and with the approval of the Director of Planning, for lighting, entrance features, fencing, and signs. Dead, diseased and dying trees or shrubbery, invasive or poisonous plants may be removed from the buffer area with the approval of the Director of Planning. With the prior approval of the Director of Planning, utilities may intrude into or cross the perimeter buffer; provided, however, that such crossings or intrusions are generally perpendicular to the perimeter buffer and are given prior approval from the Director of Planning.

3. Any new exterior site or building lighting shall have recessed fixtures with no bulb, lens, or globe extending below the casing. The casing shall be opaque and shall completely surround the entire light fixture and light source in such a manner that all light will be directed downward and the light sources are not visible from the side. Fixtures which are horizontally mounted on poles shall not exceed 30 feet in height. No glare defined as 0.1 foot-candle or higher shall extend outside the property lines. The height limitation provided in this paragraph shall not apply to athletic field lighting provided that proper permits are issued under the James City County Zoning Ordinance.
4. All traffic improvements required by the Virginia Department of Transportation (VDOT) around the Centerville Road (Route 614) and Brick Bat Road (Route 613) intersection, as well as shoulder strengthening/widening of Brick Bat Road (Route 613) between Centerville Road (Route 614) and the school site, shall be installed or bonded by James City County prior to issuance of a Certificate of Occupancy for any structure on the site. All frontage improvements required by VDOT along the school site, including the widening of Brick Bat Road (Route 613) to accommodate appropriate turn lanes, shall be installed or bonded by the developer, and the appropriate right-of-way dedicated to VDOT, prior to issuance of a Certificate of Occupancy for any structure on the site.
5. A Phase I Archaeological Study for the entire site shall be submitted to the Director of Planning for his review and approval prior to land disturbance. A treatment plan shall be submitted and approved by the Director of Planning for all sites in the Phase I study that are recommended for a Phase II evaluation and/or identified as being eligible for inclusion on the National Register of Historic Places. If a Phase II study is undertaken, such a study shall be approved by the Director of Planning and a treatment plan for said sites shall be submitted to, and approved by, the Director of Planning for sites that are determined to be eligible for inclusion on the National Register of Historic Places and/or those sites that require a Phase III study. If in the Phase III study, a site is determined eligible for nomination to the National Register of Historic Places and said site is to be preserved in place, the treatment plan shall include nomination of the site to the National Register of Historic Places. If a Phase III study is undertaken for said sites, such studies shall be approved by the Director of Planning prior to land disturbance within the study areas. All Phase I, Phase II, and Phase III studies shall meet the Virginia Department of Historic Resources' *Guidelines for Preparing Archaeological Resource Management Reports* and the Secretary of the Interior's *Standards and Guidelines for Archaeological Documentation*, as applicable, and shall be conducted under the supervision of a qualified archaeologist who meets the qualifications set forth in the Secretary of the Interior's *Professional Qualification Standards*. All approved treatment plans shall be incorporated into the plan of development for the site and the clearing, grading, or construction activities thereon.
6. The Williamsburg-James City County School Board shall be responsible for developing and enforcing water conservation standards to be submitted to and approved by the James City Service Authority (JCSA) prior to final development plan approval. The standards may include, but shall not be limited to, such water conservation measures as limitations on the installation and use of irrigation systems and irrigation wells, the use of approved landscaping materials including the use of drought-tolerant plants where appropriate, and the use of water-conserving fixtures

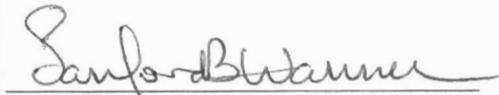

and appliances to promote water conservation and minimize the use of public water resources.

7. The developer shall integrate LID techniques and measures into the site development plan and shall work with the James City County Environmental Division to determine the most appropriate locations and techniques to be used based on the intended road, building and athletic facilities layout, grading, and drainage plan and site soils information. At a minimum 30 percent of the stormwater runoff generated from impervious surfaces shall be captured and treated by LID components above and beyond what is currently shown in the approved stormwater master plan. More than 30 percent is encouraged should greater opportunity for LID be present on the site. The LID measures shall not be used to comply with the James City County 10-point Best Management Plan (BMP) system or with the James City County special stormwater criteria as required by any applicable approved County watershed management plan. All stormwater basin components shall be in compliance with all Federal, State, and local regulations including, but not limited to, aquatic benches, forebays, landscaping, buffers/setbacks, and safety requirements. The percentage of impervious surface for the site shall not exceed 60 percent.
8. If construction has not commenced on this project within 36 months from the issuance of a special use permit, the special use permit shall become void. Construction shall be defined as obtaining permits for building construction and footings and/or foundation has passed required inspections.
9. This SUP is not severable. Invalidation of any word, phrase, clause, sentences, or paragraph shall invalidate the remainder.

Bruce C. Goodson
Chairman, Board of Supervisors
