

## Households and Population

| Fiscal<br>Year | Total<br>Population <sup>1</sup> | Institutional<br>Population <sup>2</sup> | Total<br>Household<br>Population <sup>3</sup> | Number of<br>Households | Persons Per<br>Household |
|----------------|----------------------------------|--|---|-------------------------|--------------------------|
| 1997           | 44,023                           | 667                                      | 43,356  | 16,676                  | 2.6                      |
| 1998           | 46,337                           | 817                                      | 45,520  | 17,275                  | 2.6                      |
| 1999           | 47,565                           | 827                                      | 46,738  | 18,154                  | 2.6                      |
| 2000           | 48,102                           | 994                                      | 47,108  | 19,003                  | 2.47                     |
| 2001           | 50,200                           | 938                                      | 49,262  | 19,630                  | 2.5                      |
| 2002           | 51,800                           | 912                                      | 50,888  | 20,278                  | 2.5                      |
| 2003 (Est)     | 53,100                           | 930                                      | 52,170  | 20,947                  | 2.5                      |
| 2004 (Est)     | 54,852                           | 949                                      | 53,903  | 21,638                  | 2.5                      |
| 2005 (Est)     | 56,662                           | 968                                      | 55,695  | 22,352                  | 2.5                      |
| 2006 (Est)     | 58,532                           | 987                                      | 57,545  | 23,090                  | 2.5                      |

<sup>1</sup> 2000 statistics are from the 200 Census. 2001-2003 Population Estimates are from The Weldon Cooper Center for Public Service at the University of Virginia, February 2004. 2004-2010 Population Estimates are based on Staff population projections detailed in the 2003 Comprehensive Plan.

<sup>2</sup> Institutional population figures for 1997-2006 include Eastern State Hospital, Virginia Peninsula Regional Jail, and the Merrimac Center.

<sup>3</sup> Household population represents total population minus the population of institutions.
