

**SECTION 12. SEPARATE SERVICE CONNECTIONS; MULTIPLE UNITS**

Each dwelling unit and each unit in a non-residential structure shall be served by a separate service connection and a separate meter; provided, however, the premises identified below shall be considered one premises and shall be served by one service connection and one meter:

- A. Residence used as a rooming house;
- B. Dwelling or building for transients;
- C. Dwelling with accessory apartment;
- D. Mobile home park where the utility service to each mobile home lot is included in the rent;
- E. Nonresidential structure which contains two or more contiguous units occupied by a tenant or lessee where the utility service is included in the rent;
- F. Separate houses, buildings, or mobile homes located on the same premises and under single ownership or management.
